WalDendro Software

Windows software for data acquisition and cross dating of year based data

WalDendro Software enables data acquisition based on the Dendro hardware. WalDendro Software provides functions for post-processing and conversion of the available data. In addition, cross dating of year based data is possible by comparing multiple units/entities.

Features

Main Features

- Density Data Acquisition
- Direct Control of Dendro Hardware
- Post-Processing Density Data
- Density => Year Calculation
- Crossdating Data (Multiple Parallel Units/ Entities)
- Import/Export SEL, Tucson, ...
- Direct MS Excel Export
- Year Synchronized Views
